

WEB CONFERENCING THAT MAKES SENSE

Integrated with Zultys' award winning client software - MXIE

4-in-1 Outstanding Value

The **MXmeeting™** 4-in-1 appliance provides four solutions in one unit:

- Web conferencing – sales presentations, product demos, interactive collaboration
- Web Seminar – seminars for view-only attendees, no download
- Remote Support – remote desktop support for PCs and Macs
- Remote Access - access to office or home PCs from anywhere anytime

M200/M500

M800/M1000

MXmeeting™

ALL BENEFITS, NO DRAWBACKS

MXmeeting™

Integrated audio conferencing service

You own it, you control it!

The **MXmeeting™** Web conferencing appliance plugs directly into your network. You control users, access, and functions. You can authorize as many users as you wish, restrict the user to meeting types, or restrict meeting access by IP address as well as Meeting ID and Password. You can host meetings or support sessions with your employees behind the firewall or customers outside the firewall.

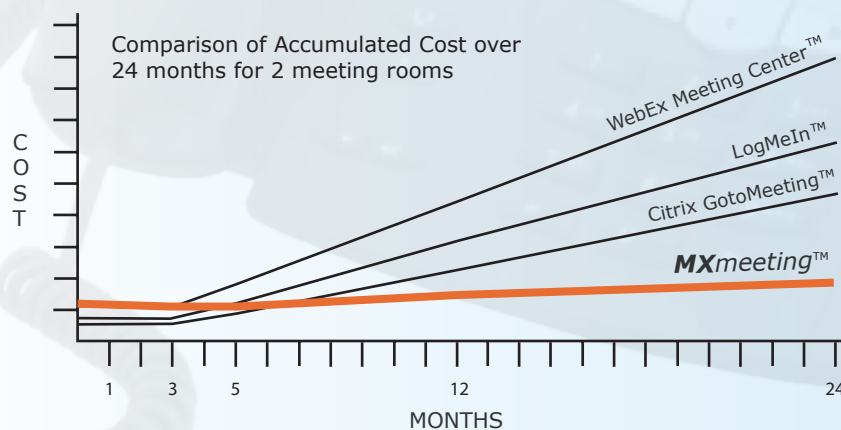

You can brand the system and integrate it with your applications and websites. You can place "Host Meeting" and "Join Meeting" buttons on any external/internal web page, or windows based applications such as audio conference or CRM systems.

Can be placed outside or behind the firewall or in DMZ
Appliance connects directly to 10/100 Ethernet port

Capacity Range:

	Included Capacity	Maximum Capacity
M200	2 rooms, 10 users	4 rooms, 20 users
M500	5 rooms, 20 users	20 rooms, 100 users
M800	25 rooms, 100 users	50 rooms, 200 users
M1000	50 rooms, 200 users	200 rooms, 2000 users

UNIVERSAL ATTENDANCE Anybody can join the meeting

The amazing Universal Attendance technology enables anyone with a modern browser, on any platform, to join a meeting. No download of any kind is required. The attendee is "view only" and can see the presenter's screen in a browser with similar speed as the fully interactive client attendee that requires a download.

Just think - no firewall, antivirus products, lockdown computers, or unsupported platforms can keep your key meeting participants from joining. And, it is fast - just 5 seconds to join. No more waiting 10 and 15 minutes to start your meeting while everyone works to get clients downloaded and connected.
